Flush wall-mounting open-voice monitor with 7" widescreen TFT LCD colour display

Expand the horizons

A field of vision which is wider than ever before. The limitations of conventional frames have been overcome at last, displaying a more panoramic view and revealing details that were previously out of shot. Revolutionary optics from every point of view.

Choose the technology

Type 72X6  7" white Sound System monitor
Type 7211  7" white Two-Wire intercommunicating monitor
Type 7214  7" white Digibus Monitor

باطل

Flush wall-mounting open-voice monitor with 7" widescreen TFT LCD colour display

- 7" high-resolution widescreen LCD monitor, for crystal-clear digital images.
- Wider field of vision due to the 16:9 aspect ratio, providing a clear view of visitors positioned at each side of the frame.
- The external appearance of the monitor can be personalised with a wide range of cover finishes and colours. Customers are sure to find the right solution whenever they decide to change the furniture or interior decor of the room.
- Highly functional keyboard with LED backlighting for easy operation even in poor lighting conditions.
- Brightness adjustment, ringtone volume and a choice of 7 different melodies.
- Equipped with dedicated push-buttons for self-start, stair light, door lock release and reply functions.
- Open voice system with "hands-free" function (no need to keep the reply button pressed during the call).
- Possibility of operating up to four auxiliary functions in the Two-Wire and Digibus versions, or intercommunicating calls in the Two-Wire version, using the buttons labelled 1-2-3-4.
- Green LED “door open” signal.
- Privacy function which disables the ringtone. In the Two-Wire and Digibus versions, when the ringtone is disabled a red LED will indicate up to 5 unanswered calls by emitting a series of flashes.
- Installation requires the flush-mounted back box type 7249, made of ABS plastic. It is supplied with a cover to prevent the ingress of mortar and grout during masonry work. The dimensions of the hole for flush wall-mounting are 189x160x52 mm.
- For greater widescreen image clarity, we recommend the use of the following electronic devices for the speech units: 559B/7, 12F5/7, 12F7/7, 1285 and 1286 with aspheric lens.
