The Elvox® Digital Stainless Steel Panels are designed to be durable and aesthetically pleasing. A panel can be customized to the particular needs of any building. Directory modules, rain hoods, surface and flush mounting boxes are available. The 122D panel can be used with both the 2 Wire system or the DigiBus system by selecting the appropriate electronic module to fit into the panel. The AISI 316* .8 mm embossed stainless steel entrance panel can be flush mounted using the 9092 back box and the 1P2(x) rain hood or surface wall-mounted with the AISI 316* 1.5 mm 1E2(x) stainless steel surface box mount. The entrance panel has an embossed stainless steel front with two, die-cast aluminum headers fastening it to the frame using a special ELVOX screw. The drop-in frame is also constructed of stainless steel. The 122D is rated to IP44 indicating both dust and water resistance.
